Dear Triton Families:

Technology is ever changing, and we are becoming increasingly more dependent on systems and computers for our day to day activities. In order to prepare our students to compete in the 21st Century Global Economy, we have to continually provide current and meaningful technologies for our students. While we have made some strides with funding, and there are fixes for current problems in the works, we feel that it is important to begin to wrap the collective community into future decisions. Changes and upgrades in technology come with a steep price tag. Decisions of this magnitude require more global input. To that end, we are in the process of forming a District Technology Committee.

The purpose of the committee will be to act in an advisory role to the administrative team in regards to all decisions regarding technology. The committee will be comprised of representatives from parents, staff members, and building administrators. The compilation of the group will hopefully be a blend of technical and non-technical members. It is my goal to be able to have parents on the committee who work in the private sector in some technical capacity.

I am looking for a parent representative from each school to sit on this committee. The meetings will most likely be scheduled in the late afternoon/early evening, but will be ultimately scheduled based on the schedules of the committee members. This will not be a short lived committee, thus we would ask for a commitment accordingly. I anticipate that the District Technology Committee will meet on a bi-monthly basis.

If you would be interested in representing your child's school as the parent representative, please contact me by email at bforget@trsd.net or by phone at (978) 465-2397 ext. 5277.

Respectfully,
