

The Triton Regional School District  
Special Education Advisory Council  
Invites You to Attend a Talk

Medication-free, Alternative Therapies  
For ADD, AD/HD, Dyslexia, Autism, Auditory Processing,  
Sensory Integration and other learning difficulties

Presented by

*My Sensory Solutions* and Dore at the Hallowell Center

Wednesday, November 19, 2008  
7 PM

Newbury Elementary School  
63 Hanover St.  
Newbury MA

**Did you know that reading problems have more to do with the ear than the eye?**

*If the ear doesn't hear a sound frequency, the voice cannot say the sound.* Learn about ***My Sensory Solutions***, a soothing listening therapy that stimulates the ear-eye connection, and helps the brain hear the sounds necessary for processing. The parts of the brain crucial for learning, communicating, focusing, and movement are retrained by utilizing a new generation of Tomatis-based **auditory listening programs with specific vocal, visual, and vestibular stimulation**. For more information visit

**Having trouble with focus, academics, and confidence?** **Dore** can help with its clinically proven, medication-free treatment for children and adults that focus on the root cause of the problem. Research shows ADHD and dyslexia are caused by a delay in the integration of sensory information between the brain's cerebral cortex and the cerebellum.

**Dore** successfully reduces this delay with personalized exercises that take only minutes per day in your own home. For more information visit [www.drhallowell.com](http://www.drhallowell.com)
